2011

INTERNATIONAL EXHIBITION

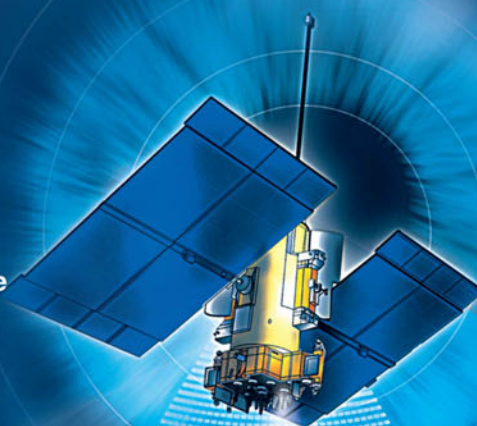

## NAVITECH-EXPO'2011

1-3 JUNE / [www.navitech-expo.ru](http://www.navitech-expo.ru)

EXPOCENTRE FAIRGROUNDS  
Moscow, Russia

INCLUDING MAJOR CONTRIBUTIONS FROM:

- Navigation Information Systems JSC
- Russian Space Systems JSC
- Concern PVO «Almaz-Antey»
- Research Design Lab. «NAVIS»
- Russian Institute of Radionavigation and Time
- NAVTEQ CIS
- SPE Transnavigation
- Moscow Design Bureau «Compas»
- Topcon Positioning Systems Inc
- Avtosputnik software
- M2M telematics JSC
- SPIRIT TELECOM
- Izhevsk State Radio Plant
- AeroNavigatsia
- Research and production company GPScom
- MACRO GROUP

The use of space technologies, including, naturally, GLONASS, will become a priority direction of our work. This system will enable people to use the modern navigation equipment in cars, will help to provide the safety of transport and technically complex objects, to improve coordination of the work of the services which are responsible for the prevention of accidents and emergencies, for the elimination of consequences of natural and technogenic disasters.

D. Medvedev - President of the Russian Federation (From the message of President of the Russian Federation D. Medvedev to the Federal Assembly of the Russian Federation, 30th November, 2010)

## ABOUT THE FORUM

The Forum represents the central event of year in the field of social and commercial use of satellite navigation technologies and, first of all, the Russian satellite navigation system GLONASS.

The main purpose of the Forum is to inform a wide Russian and foreign audience on the state and plans of the development of satellite navigation systems, on the national policy in the field of the use of the system GLONASS in Russia, innovative technologies, the newest equipment of satellite navigation and services, the international experience of the use of navigation systems, the creation of unified international standards in satellite navigation.

## TARGET AUDIENCE

- State agencies and bodies
- Regional, Municipal and District Administrations
- Regional and municipal housing and utilities services
- Emergency rescue teams
- Space, aircraft, shipbuilding and car industries
- Road-building and maintenance organisations
- Transport R&D and design organisations
- Developers and manufacturers of subscriber equipment and system applications
- Car transport companies
- Retail networks, big private owners of vehicle fleets
- Logistics and forwarding companies
- Mobile operators
- Content providers
- Guard and search companies
- Insurance companies
- Foreign providers of satellite navigation-based services

Registration fees	Upon registration and payment before 31.03.11	Upon registration and payment after 31.03.11
2 day Forum participation (includes lunch, refreshments, full conference documentation and exhibition pass)	<b>EUR 375</b> + 18% VAT	<b>EUR 415</b> + 18% VAT
Round table <Protection of the market of the GLONASS technologies from poor production and unfair competition> Round table <Project Social GLONASS>	<b>EUR 100</b> + 18% VAT	<b>EUR 100</b> + 18% VAT
Gala Dinner	<b>EUR 95</b> + 18% VAT	<b>EUR 95</b> + 18% VAT

With a support on the possibilities of GLONASS we have launched two large-scale projects that have strongly pronounced social importance. They are the introduction of common number <112> to call rescue, medical services and the militia under emergencies and, as logic continuation of this project, the formation of the system of emergency response during road accidents <ERA GLONASS> has been started. The purpose of the introduction of these systems is as much as possible to reduce time for delivering assistance to the people who get into trouble.

We have chosen the modernization of the national economy, the development of high technologies as our priority. And so, the system GLONASS is high technologies in direct and figurative sense without which the modernization of the country is impossible. We need to take one more step forward together with you - to make this system economically sound, effective.

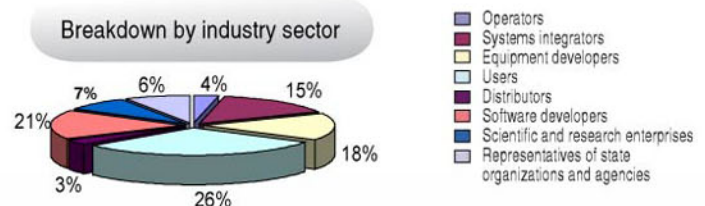

V. Putin - Chairman of the Government of the Russian Federation (during the meeting on the use of the GLONASS technologies for the benefit of the social and economic development of regions, 10th August, 2010).

## INTERNATIONAL EXHIBITION NAVITECH-EXPO'2011

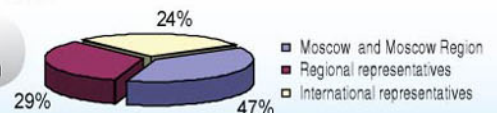

The exhibition will present the key Russian and foreign developers and manufacturers of satellite navigation hardware and software (including mapping applications) and highlight multiple business advantages of satellite navigation.

To ensure your company's success and to benefit from the industry boom, you need to gain a footing on the satellite navigation market both in Russia and worldwide. Make full use of the Navitech-Expo'2011 exhibition to promote your products and services, as this is a real opportunity to raise awareness of your brand and maximise your profits.

Breakdown by industry sector

Breakdown by geographical region

## AGENDA

- **Plenary meeting <GLONASS: from the creation of the satellite grouping to the creation of the market of navigation services>**
- **Workshops:**
  - The emergency response system <ERA GLONASS>
  - Satellite Navigation Systems
  - Satellite navigation technologies in intelligent transport systems
  - Information and navigation systems. Transport monitoring and control in systems of enterprise management
  - Automobile and personal navigation: equipment and technologies
  - Aviation navigation systems and navigation equipment
  - Satellite navigation technologies in construction, land management and nature management
  - Satellite navigation technologies use in railway transport
  - Satellite navigation use in sea and river transport
- **Round tables: Protection of the market of the GLONASS technologies from poor production and unfair competition> Project Social GLONASS**

To participate as a delegate, speaker, sponsor, exhibitor, please contact Professional Conferences Company, tel. +7 (495) 66 324 66, e-mail: [office@proconf.ru](mailto:office@proconf.ru)
